

horizontal multi-stage jet/centrifugal pumps

This product is Listed to UL Standards for Safety by Underwriters Laboratories Inc. (UL).

LT2 Series Multi-Stage Jet Pumps are the highest performing pumps available in its category. The LT2 Series Convertible Jets utilize the Berkeley® built-in regulator, offering easier priming and better range of performance from a complete line of Shallow Well, 4" Double Pipe, 2" and 3" Single Pipe Jet Packages. Pump may also be operated as a self-priming centrifugal (to 25 ft.) to provide a wide range of high pressure applications.

APPLICATIONS

- **Water systems and sprinkling...** for homes, farms and cottages.

SPECIFICATIONS

- Body** – One-piece rugged cast iron
- Pump and Motor Shaft** – 416 stainless steel
- Impeller** – Polycarbonate
- Diffuser** – Corrosion-resistant cast iron
- Pressure Switch Pre-Set** – 30-50 PSI
- Suction Ports** – Drive-over-Suction

ORDERING INFORMATION

Catalog Number	HP	Pipe Tapping Sizes			Stages	Motor Voltage	Approx. Wt. Lbs.
		Suct.	Drive	Disch.			
7LT2	3/4	1-1/4"	1"	1"	2	115/230	50
10LT2	1	1-1/4"	1"	1"	2	115/230	80
15LT2	1-1/2	1-1/4"	1"	1"	2	115/230	85

AUTOMATIC PRESSURE REGULATOR – DEEP WELL

Catalog Number	Description	Application	Approx. Wt. Lbs.
PKG 107	Regulator, tubing, pipe plug and compression fitting.	Required for ALL deep well installations.	4

Order pump and pressure regulator if required, from ordering information tables above. A jet package and the automatic pressure regulator, described above, are required on all deep well installations.

Berkeley® is a registered trademark with the U.S. Trademark Office. In order to provide the best products possible, specifications are subject to change.

LT2 SERIES

FEATURES

- Automatic Pressure Regulator** – Faster-acting and quieter, design eliminates “hunting” for correct drive pressure. New improved stem and guide are precisely molded to assure efficient, trouble-free performance on all deep wells. See ordering information (Deep well only).
- Quality Construction** – Close-grained cast iron pump body is rugged, one-piece unit, specially treated to resist corrosion. Drain port provided for easy winterizing.
- Precision-machined Diffusers** – Assure faster priming.
- Mechanical Shaft Seal** – Precision lapped and highly polished carbon-ceramic, stainless steel construction. Internal design guarantees continuous water lubrication for maximum protection.
- Polycarbonate Impellers** – Precision molded for perfect balance, and ultra-smooth for highest performance and efficiency.
- Motor Windings** – Superior insulation materials protect against excessive moisture and contaminants to ensure prolonged motor life.
- Dustproof Cover** – All electrical components are protected from dirt, dust and insects by a dustproof canopy. Ventilating air cannot contaminate vital switching components. This eliminates the most common cause of motor failure.
- Balanced Rotor** – Rotor is die cast under high pressures for uniform performance and greater efficiency; dynamically balanced.
- Heavy-duty Ball Bearings** – Shielded, permanently lubricated bearings are extensively tested to ensure extended life and smooth, quiet operation.
- Pump and Motor Shaft** – One piece threaded shaft for positive impeller drive and alignment. Shaft is stainless steel for maximum corrosion resistance.

horizontal multi-stage jet/centrifugal pumps

* Order Jet Package separately. **S.O. = Shut Off Pressure in PSI.

PUMP PERFORMANCE

Tested and rated in accordance with Water Systems Council standards.

NOTE: Pumps installed with a Pro-Source™ tank require a 100 PSI relief valve. Pumps installed with a conventional tank require a 75 PSI relief valve. Relief valve must be capable of relieving entire flow of pump at relief pressure.

NOTE: Dotted lines indicate performance reduction at high suction lift.
